chinmaykhewale2005@gmail.com | github.com/DivyankLosse | divyankkhewale.vercel.app

CAREER OBJECTIVE

AI Engineer with hands-on experience building Generative AI, Computer Vision, and LLM-powered applications. Skilled in Python, Machine Learning, Deep Learning, NLP, MLOps, and full-stack deployment (Git, Docker, Vercel, Render, VPS). Proven track record shipping production AI systems including real-time posture detection, AI report generation, and smart automation tools. Seeking an AI/ML Engineering role to build and deploy scalable, intelligent, production-grade systems.

EDUCATION

GH Raisonni University <i>B.Tech, Computer Science & Engineering</i> Sanjo Convent School <i>Senior Secondary (XII), CBSE Science — Percentage: 66.80%</i> Sanjo Convent School <i>Secondary (X), CBSE Percentage: 80.10%</i>	Amravati 2023 – 2027 Chandrapur 2023 Chandrapur 2021
---	---

EXPERIENCE

AI Engineer Intern <i>iGurus</i> – Built an AI Posture Report Generator that uses computer vision to analyze patient posture and generate detailed health reports. – Developed Live Posture Guardian, a real-time posture monitoring tool that detects slouching and poor posture and sends instant desktop notifications to users. – Designing an AI-powered astrology report platform (Astrotalk-style) that collects user details and auto-generates personalized 40–60 page astrology reports using LLMs. – Building a Yoga Pose Correction system using computer vision to detect incorrect yoga postures and provide real-time corrective feedback.	Pune Jun 2026 – Present
--	----------------------------

PROJECTS

Sign-Bridge React, FastAPI, MongoDB – Developed AI-powered ASL translation platform using React + Vite frontend, FastAPI backend, and MongoDB. – Built accessibility-focused workflow for real-time sign language communication.	Jan 2026 – Apr 2026
SSS Startup Survival Simulator LLM Agents, OpenEnv – Designed AI simulation environment using LLM agents for startup decision analysis. – Modeled burn rate, churn, market pressure, and funding scenarios using LLM-powered agents. – Built autonomous decision workflows for startup strategy testing.	Mar 2026 – Apr 2026
AgriLO Smart Farming Assistant AI, IoT, Computer Vision – Developed AI + IoT farming assistant integrating soil monitoring and plant disease detection. – Implemented computer vision workflows for crop analysis and predictive farming recommendations.	Dec 2025 – Feb 2026

TECHNICAL SKILLS

AI / ML & GenAI: Python, TensorFlow, PyTorch, Generative AI, LLM Development, OpenCV, Scikit-Learn, NLP, Computer Vision, Reinforcement Learning, MLOps
Web & App Development: React (Basics), MERN Stack (Basics), FastAPI, REST APIs, MongoDB
Deployment & DevOps: Git & GitHub, Docker, CI/CD, Vercel, Render, VPS Deployment, Model Deployment
Data & Cloud: Data Science, Data Analytics, Data Pipelines, AWS (Basics), Automation Pipelines

TRAININGS & CERTIFICATIONS

Data Science And Machine Learning Binary Brains, Nagpur Python And Data Analytics Binary Brains, Nagpur	Mar 2025 – Aug 2025 Sep 2024 – Feb 2025
--	--

ACHIEVEMENTS

- Finalist at India's largest AI hackathon among 56,000+ participants hosted by Meta, Hugging Face, PyTorch, and Scaler School of Technology.
- Built 5+ AI projects spanning Generative AI, Computer Vision, LLM Agents, NLP, and IoT systems.
